Dataset

```
#tinytex::install_tinytex()  
data <- read.csv("C:/Users/YIGIT/R/TRIR71.csv")  
#View(data)  
#summary(data)
```

Description of dataset

The data set is the one I plan to use for my masters thesis. (*They say not to share the dataset with someone else, but I don't think there will be an issue to share with you.*) It is a cross-sectional survey data from the Demographic and Health Surveys for Turkey from the year 2018, which is a representative household survey providing detailed information on birth recodes and individual records for women of each household for developing countries.

The potential questions I am interested in exploring are:

- Effect of childbirth on female labor force participation
- Effect of living conditions on early childhood development
- And additional ones I might discover along the way
